HERD COUNT:						29				30				32				30/28				27				24				19 Low 16L/9PI/4stalls 11L/17PL					28
Management Goals:		-----OPEN CANOPY & KNOCKDOWN SKELETONS-----TRAMPLE EMERGING WEEDS-----																																	
		TIER TWO DORMANT SEASON: 6-8 wks on; 60 days rest stock density approaching 1 animal/ acre TIER THREE DORMANT SEASON: 2-4 wks on; 60 days rest stock density less than 1 animal/ acre																																	
ADJUSTMENT GOALS FROM PRIOR YEAR:		<ul style="list-style-type: none"> *Use the (Upper) Sullivan more *Shorten dormant season rotations to 4 weeks max to meet Tier III requirements *Shorten winter stay in FM slightly *Shorten winter stay in LSR by a week *Encourage earlier Spring dieting for certain horses, so that time off pasture is shorter & horses healthier 																																	
DISCUSSION:		Feed in Sullivan Nov 8 - 21: hay enclosure as AGP project. Try tarp alternative?

Management Goals:	-----EAT ANNUALS BEFORE SEEDING & FAVOR PERENNIALS-----																		-----OPEN CANOPY & KNOCKDOWN SKELETONS-----																
	TIER TWO GROWING SEASON: 4-6 wks on, 30 days rest stock density approaching 1 animal/ acre																																		
	TIER THREE GROWING SEASON: 1 wk or less on, 30 days rest stock density greater than 1 animal/ acre																																		
ADJUSTMENT GOALS FROM PRIOR YEAR:																																			
DISCUSSION:	Planned DiETING April 10 - 23: (1) early intervention; (2) rest of herd can comply with Tier III in lush areas.																		Ask EBMUD to exempt Pear Orchard June 1 - 27 from Tier III parameters: once a year grazing for this length of stay has proven effective for fire control and pasture maintenance.
